CLINELL REDIROOM - OFFICIAL PRODUCT LAUNCH

Gama Healthcare is proud to introduce the world's first instant patient isolation room, the RediRoom, which can be assembled around a patient in less than 5 minutes.

The RediRoom is designed to assist in isolating infectious patients and improve patient flow within a hospital ward environment. It can also be used in the military, in airports and cruise ships as well as pandemic situations.

It acts as single room to isolate infectious patients under contact or droplet precautions to prevent transmission of disease to other patients.

The RediRoom has its own HEPA and carbon filtration system, which filters infectious air as well as providing temperature control and odour elimination. It also incorporates a hands-free door opening mechanism, which removes the risk of hand contamination.
